

Zanin F.lli srl is synonymous of quality, research and development of avant-garde products. Flexibility, customization and services complete the quality of this all-Italian excellence.

In recent years there has been a lot of talk about malting systems. The art of malting is no longer relegated to large industrial production, but it's now possible thanks to Zanin F.lli srl to produce excellences in customized batches even of 500 kg. The 60-year experience in curd drying, involvement in air handling, completely satisfies the need to produce large varieties of malted seeds and offer millers special flours, new bases for bakery products, prepared for intolerants or allergic. In the beverage field, malt masters can customize malts and distillers can improve their secret recipes.

With a certified ISO 9001 TÜV SÜD production process, Zanin F.lli supplies quality machines and systems, designed with the best 3D graphics programs, created with the latest generation of laser cutting and punching machines, tested and produced by Zanin's modern workshops. With the careful supervision of Oscar and Nicodemo Zanin and their exceptional knowledge of the industry that over 60 years of experience can guarantee.

Zanin F.lli srl is also environment quality, the machines are designed to reduce electricity consumption, reduce burner consumption but above all, to reduce and eliminate impurities in the air.

Food sector

- Plants of MALTINGSYSTEMS for CEREALS
